WELCOME

TO THE UNIQUE WORLD OF LIVE EDGE TABLES.

EACH TABLE IS LIKE NO OTHER. . .to be enjoyed as it grew in nature, with it's unique grain patterns, and compellingly beautiful variations. We start with logs many of which are reclaimed from local tree removal services, and find new purpose for them. We enjoy many different Pennsylvania hardwoods, including walnut, cherry, sycamore, elm, and maple. You choose which top will suite your purposes, and match to a base style that will complement your decor and taste.

ROUGH MILLING the table blanks is done here at Zimmerman Chair. Each log has it's own challenges and exciting possibilities.

THE DRYING PROCESS takes time. Properly dried wood is important to produce a stable table top surface. We have an inventory on hand that will give the drying process time to work.

TABLE TOP SELECTIONS

We do not limit ourselves to certain wood species. Any large log is a viable option.

We have found much character in more unusual species as elm, sycamore, beech, box elder, and locust. Along with these options, we have walnut crotches, spalted maple, and ambrosia maple.

Every plank will be different in figure and size. For current options, please check our website at. . .
